Veloraxzia Tenebris

Too damn late

1.1)

The graphs include the endpoints and have no zeros.

1.2)

The zero in the (1c) forces K to exist between -1 and -2.

The graph in (1b) has $K \leq -2$ while the graph in (1c) has $-2 \leq K < -1$.

1.4)

There's only one branch on each of the graphs.

2.1)
